

FRAINER ENCARNACIÓN

FULL STACK DEVELOPER

+2 years of experience as a Full Stack Developer. Track record building high quality and high performance modern web applications with significant involvement in both front-end and back-end and contributing with innovative customer-centric products. Backed by an entrepreneurial mindset and high leadership skills oriented to business development.

MOST RECENT WORK EXPERIENCE

Full Stack Developer at Nelmix Solutions

Sept 2022 - Jan 2023 [Santo Domingo, Dominican Republic] [Software Services Company, B2C]

RESPONSIBILITIES

- Development of modules for Odoo ERP and CRM oriented to customer needs, mainly for accounting and product management applications using technologies such as Python/Odoo, JavaScript, XML, CSS, Docker, TDD, MVC, among others.
- Migration of Odoo custom modules from older versions to the latest versions to improve customer experience and avoid integration failures.
- Ensuring that each development meets the needs presented while maintaining high development quality and performance.
- Apply good programming practices following clean code principles and proper documentation in the back-end and front-end applying UX and UI to facilitate user interaction.

KEY ACCOMPLISHMENTS

- Improved efficiency of the development team by reducing development time and module migration exponentially.
- Improvement in the use and application of agile methodologies to reduce development times and increase team efficiency.
